

Introduction to Web Development CAWEB-506-1503

Time to Surf

Task 3

Matthew Grima 5.2B

This will be a review of a website called “Autumn Berry” created by Becky Refalo. The website only has one page only which is the frontpage.

IPO Chart

Input	Process	Output
One of the links of the navigation is clicked on	The website sends you to the expected page	You are on that page
Entering info in “log-in” form	The info should be sent to the email address	Email arrives at the email address.
Clicking on “Create new account”.	The user will type in his info.	A new account is created
Clicking Submit without putting in info.	The website tells you “Email Address/Suggestion is required”	The website tells you “Email Address/Suggestion is required”
Burger menu is clicked	Burger menu opens	Burger menu is opened and all the link options are shown
The user writes something in the search bar.	The search term is entered	The website shows the results to the user
You click on a different language of your choice	The website changes its language from English to the chosen language	The text on the website is completely translated to the chosen language
Clicking on any social media icon	The user is sent onto the website’s social media accounts	The social media account is opened for user to see.

Test Cases

Test Description	Expected Output	Actual Output	Pass/Fail	Notes
Navigation in the navigation menu	The website sends you to the expected page you clicked on.	Nothing happens	Fail	No other pages were created besides the front page.
“Log-in” Form	You are logged in and directed to the website.	Nothing happened	Fail	“Log-in” link not functioning
Creating a new account	The user is able to create a new account	Nothing happens	Fail	Account page not created
“Required” function	The website tells you “Email Address/Password is required”	Nothing shows up after clicking “SIGN IN”.	Fail	No command was created
Burger menu	The menu is exposed	The menu is exposed and all its content is revealed.	Pass	Even though the burger menu works, none of the links

				provided after burger menu is opened function
Search bar	The website shows the results to the user	Nothing shows up	Fail	You could still type anything in it.
Clicking on any language on the "Language change" function would change the language of the website	The website's language is completely changed	Nothing happens	Fail	The languages provided were English (both US and UK) and French, but the translator is not functioning
Clicking on social media account icons	The user is sent to the website's social media account	Nothing happens	Fail	The icons shown were of FaceBook, Instagram, Pinterest and YouTube, but none worked

Code Validation

Upon checking the website's code for validation (<https://validator.w3.org/> was used for this), I've discovered that there is no heading element of h1 which isn't really problematic for the website itself.

1. **Warning** This document has heading elements but none of them has a computed heading level of 1.
From line 120, column 5; to line 120, column 28

↵

<h2 class="login-title">Login<

For the code of the CSS file used for the website, everything turns out to be fine since no error has been detected which indicates that the code is well written. The website <https://jigsaw.w3.org/css-validator/> was used for the decoding.

W3C CSS Validator results for style.css (CSS level 3 + SVG)

Congratulations! No Error Found.
This document validates as [CSS level 3 + SVG](#) !
To show your readers that you've taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the XHTML you could use to add this icon to your Web page:

```

<p>
  <a href="https://jigsaw.w3.org/css-validator/check/referer">
    
  </a>
</p>

```

Final Evaluation

The website presentation is pretty decent, but of course the website has a lot of issues. First of all, the website feels overly empty since there is no imagery involved in the website. Images would at least help the website look and feel livelier.

The typography used is way too small for anyone to read and understand. Bigger typography helps the website be readable by anyone who is using the website.

What I really liked about the website's overall presentation are both the burger menu and the "sign up" popup.

The Sign-up popup looked very polished compared to the rest of the site. Everything was centred and ordered in a way that is comfortable for the human eyes.

One thing I wished the student could have improved on is at least include one other page for the website in order to show more content on the website.
